

John James Wilson, MD

Penn Medicine Radiation Oncologist

Dr. Wilson has been practicing radiation oncology for 15 years. He is on staff at Penn Medicine and attended medical school and residency there as well. He treats all cancer types that need radiotherapy, and leads a highly trained team of experts at Shore Cancer Center Radiation Oncology, offering advanced radiation treatment options close to home

Dr. Wilson's leadership and expertise in radiotherapy, along with his Penn Medicine affiliation, allowed us to easily integrate Penn Cancer Network resources into patient care at Shore Cancer Center.

Shore Cancer Center recently added a TrueBeam Linear Accelerator to its radiation oncology program.

The new TrueBeam linear accelerator offers more flexible treatment options, advanced imaging, high precision dosage control, and streamlined treatments. With Dr. Wilson's expertise and the linear accelerator's new treatment technology, Shore Cancer Center treats patients with more complex cancer diagnoses high quality care close to home.
